

Getting Started with Worbla

Worbla is used in many ways, but here's a quick guide to getting started with Crystal Art.

Remember Worbla is hot when activated! Use caution when applying heat.

You **MUST** use gloves with Crystal Art, as it needs to be heated above boiling to activate.

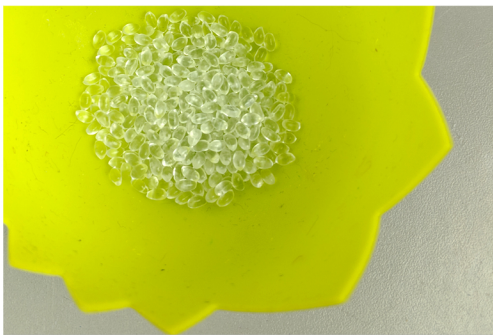

Made with Worbla

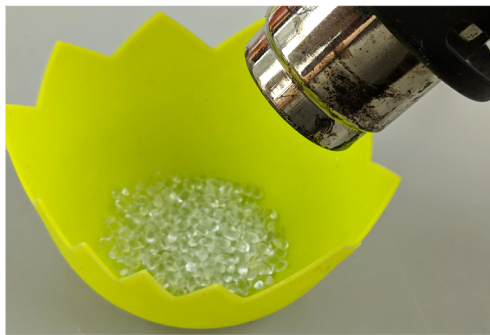

Important! Crystal Art is hot!

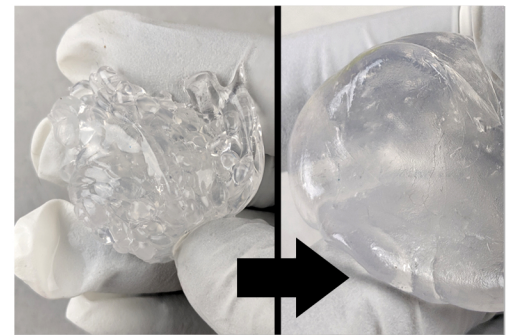

Use work gloves with latex or nitrile gloves over them

Pour pellets into a silicone container or bowl lined with parchment paper

Heat evenly with a heat gun

Keeping gloves wet, knead pellets together

Crystal Art can be dyed with polyester dyes

You can add paint or pigment for different results

Keeping gloves wet, knead color into Crystal Art

Shape by hand or press into mold

You can re-heat Crystal Art to join pieces together

Wrap with wire to create unique pendants and jewelry
